	Urgent	Not Urgent
Important	Do - (Your MVP) ● Make a List of Movies and their characteristics ● Create usable if statements to check Time, Genre, Language and print those that match all preferences. ● Create a loop to check the next movie in Movie.txt which exits and ends the program if there are no more movies to check.	Schedule - (for V2.0+) ● Plan out a more in depth flow chart ● Test if the IF statements are working properly ● Check if printed outcomes come with description ● Make sure weird user inputs get correct responses. (“not a valid input”) ● Practice terminal Commands.
Not Important	Delegate - (Use a library) ● Find which movies to use for this program ● Troubleshooting layout issues ● Assistance in setting up a complex file folder.	Delete - (Cut it) ● Don’t make interface elaborately pretty ● Don’t try adding trailers or plots. ● Don’t add more complex preference types.
